

▶ JOHN ZINK'S JZ® SLIDE-'N-LOCK™

An Innovative New Primary Air Door for Premix Burners

THREE-BOLT CONFIGURATION (SHOWN AS MOUNTED)

John Zink Company, a world leader in developing advanced combustion technologies and environmental systems, introduces the JZ Slide-'N-Lock primary air door – a unique new premix burner accessory engineered to help make your operations more efficient and less expensive.

The JZ Slide-'N-Lock primary air door is designed so you burn less gas at a higher flame temperature. With an easily adjustable air door and quick orifice disconnect, our JZ Slide-'N-Lock enables you to increase capacity safely while saving you time and money.

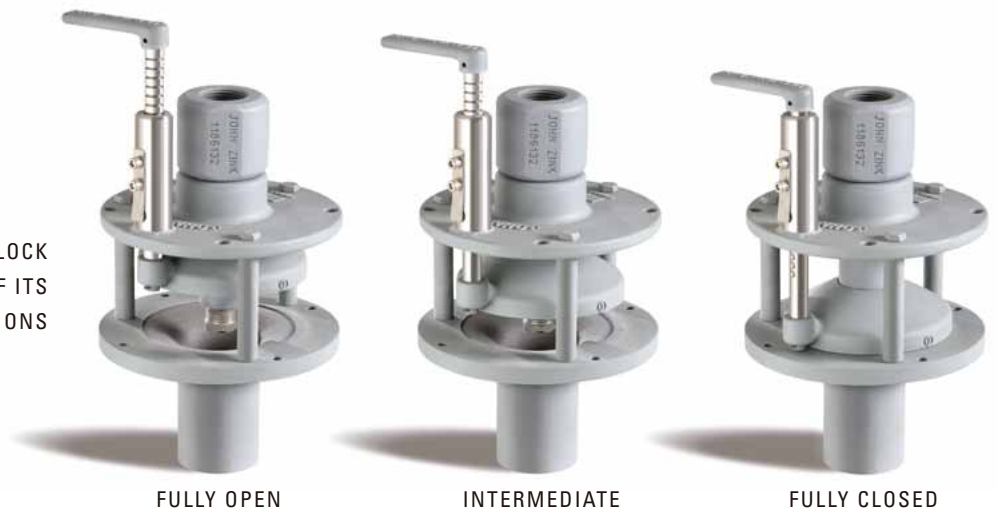

JZ Slide-'N-Lock Features

- ❑ Low maintenance design includes no threads to seize
- ❑ Durable construction ensures reliable performance
- ❑ Ergonomic configuration enables safe, efficient access
- ❑ Designed to fit three- or four-bolt mountings

JZ Slide-'N-Lock Benefits

- ❑ Fuel savings
- ❑ Reduced labor cost
- ❑ Interchangeable with most existing equipment
