

Who is helping refiners around the world turn flare emissions into profits?

Every minute your flare burns, valuable hydrocarbons escape into the atmosphere, adding to your emission levels and denying your refinery millions of dollars.

That's why John Zink Company offers a smart solution to dramatically reduce flare emissions while recovering spent gas as fuel, feedstock or product.

Our flare gas recovery systems around the world have saved hundreds of millions of dollars and reduced emissions by billions of pounds.

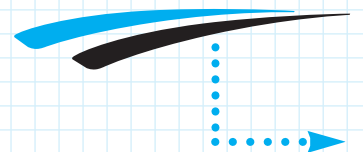

Zink's flare gas recovery solutions are the ultimate in environmental control – with serious payback – reducing costly emissions and capturing the value of flare gas to stop them from going up in smoke.

As the world's leading manufacturer of flares, John Zink® knows a thing or two about designing the most advanced flare gas recovery system for your application.

Zink delivers the engineering expertise and emissions control technology you've come to expect – with the outstanding economics you never expected. Get a firm grip on a new bottom line with flare gas recovery solutions from John Zink Company. *Now, that's smart thinking.*

Think Zink®

Flare gas recovery solutions from John Zink Company

Environmental control. With serious payback.

- Rapid return on investment
- Eliminates combustion by-products of NO_x, CO and CO₂
- Reduces overall plant emissions
- Reduces plant fuel gas consumption
- Reduces plant steam consumption
- Minimal maintenance
- Designed for ultimate safety, reliability and performance

Start capturing emissions and economics today with John Zink flare gas recovery solutions.

Call John Zink today at

800-421-9242

to learn more about flare gas recovery economics and to schedule an on-site engineering evaluation.

John Zink's flare gas recovery solutions include:

- Engineering and on-site feasibility studies
- Economic analysis
- System design and customization
- Advanced manufacturing and quality control
- Global field service
- The world's largest combustion resource at John Zink's International Research & Development Test Center
- Start-up and training
- Attractive financing packages available
